DETAILS OF THE LINKED END USE PROJECT

The deposit consists of iron ore of different types, both physical & chemical which caters as a good raw material suitable for iron ore industries. This block was auctioned by the State Govt as Commercial Block i.e. the iron ore produced from this mine can be sold in the open market. Simultaneously, the applicant himself requires iron ore for its own Integrated Steel Plant situated at Thelkolo, near Jharsuguda in Odisha.

In general it can be concluded that the raw material produced from this block will be utilized in our steel plant as well as ,if require, may be sold to different industries within India or may be exported if such a situation arises.
