HEIGHTS & CONTOURS IN METRES  
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water. Contoured areas are coloured yellow. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribbons.

Contours are approximate. A relative height, or, represents the approximate height in metres between the top and bottom of a steep slope. Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The state boundary between Arunachal Pradesh and Assam shown on this map is as interpreted from the North-Eastern Areas (Re-organisation) Act 1951, but has not been verified by the Government concerned. The sheet has been revised as a result of verification surveys in respect of names, communications and other details carried out during 1988-89. Areas temporarily coloured areas occur in the jungle in square C3, they are normally abandoned after 2-3 years and are not shown. Betchroot trees are shown thus.

Namghang shown in this sheet are community worshiping places.
