

Justification for locating the project in forest area

The area adjacent to the proposed project in forest area is industrial hub developed by WBIDC, an industrial development wing of the Government of West Bengal in which our existing TMT plant has been installed. But the existing plant is not viable in the prevailing condition of the market, so we urgently require direct hot charging billet plant connecting the existing TMT plant to supply hot billets.

We have approached WBIDC for the required land for the said plant but there is no available land adjacent to our existing plant. We have no other option but to look after the vast areas adjacent to our factory which are lying vacant unused for any forest related purpose. For the survival of the existing TMT plant that unused forest land is only savior from closure.
