NOTES :-

Heights are in metres and above Indian mean sea level.

Contours are approximate.

Towns shown dry, in this area usually contain water from July to December.

Unimproved roads in this sheet are generally available in dry season. Permission to use these roads in forest areas is required from the Forest authorities.

A relative height (e.g., 10) marked along a contour indicates the height of the top of the contour benchmark above the adjacent country.

A relative height, in, represents the approximate height, in metres, between the top and bottom of a river slope.

The station boundary between Anupali & Boudh Districts and between Boudh & Kathmandu Districts have been surveyed as posted out by the local officials on the ground but have not been verified by the Survey authorities.

Hand Pump is shown blue.
