SURVEY OF INDIA

1st Edition, 2011

Price: £70/ea

CONVENTIONAL SYMBOLS

REFERENCES

Dry Contour

NOTES :-

Heights are in metres and above Indian mean sea level.

Contours are approximate.

A relative height, *h_r*, represents the approximate height, in metres, between the top and bottom of steep slopes.

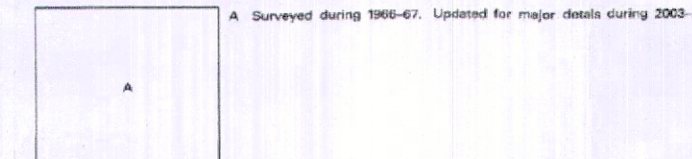

Tanks, shown by *th*, are usually contain water only during dry season.

The district boundary in the Ganga River follows the main deep channel and will change with the fluctuation of that channel.

All cart tracks and unmetalled roads in this sheet are usually metacarbon in dry season.

The areas adjoining the Ganga and Main Rivers are liable to change owing to colourous fluctuations.

COMPILATION INDEX

Projection - UTM Datum - WGS 84
Magnetic Variation from True North about $\frac{3}{2}^{\circ}$ East in 2005.
