SURVEY OF INDIA

INTERNATIONAL SYMBOLS

1. What is the difference between a "strong" and a "weak" form of a vowel?
 A strong form of a vowel is pronounced with more force and clarity, while a weak form is pronounced more lightly and quickly.

2. What is the difference between a "long" and a "short" vowel?
 A long vowel is pronounced for a longer duration than a short vowel.

3. What is the difference between a "close" and an "open" vowel?
 A close vowel is pronounced with the tongue close to the roof of the mouth, while an open vowel is pronounced with the tongue low in the mouth.

4. What is the difference between a "front" and a "back" vowel?
 A front vowel is pronounced with the tongue towards the front of the mouth, while a back vowel is pronounced with the tongue towards the back of the mouth.

5. What is the difference between a "high" and a "low" vowel?
 A high vowel is pronounced with the tongue high in the mouth, while a low vowel is pronounced with the tongue low in the mouth.

6. What is the difference between a "diphthong" and a "monophthong"?
 A diphthong is a vowel sound that changes from one vowel to another within the same syllable, while a monophthong is a single, pure vowel sound.

7. What is the difference between a "stressed" and an "unstressed" syllable?
 A stressed syllable is pronounced with more emphasis and a longer duration, while an unstressed syllable is pronounced more lightly and quickly.

8. What is the difference between a "primary" and a "secondary" stress?
 A primary stress is the most prominent stress in a word, while a secondary stress is a less prominent stress.

9. What is the difference between a "word stress" and a "sentence stress"?
 Word stress is the stress placed on a particular syllable within a word, while sentence stress is the stress placed on a particular word within a sentence.

10. What is the difference between a "pitch accent" and a "pitch contour"?
 A pitch accent is a change in pitch that occurs on a particular syllable, while a pitch contour is the overall pattern of pitch changes in a sentence.

Figure 1 illustrates the experimental setup. A subject is seated at a table, viewing a video screen. A camera is positioned above the screen. A horizontal bar is placed on the table, with a vertical rod attached to it. The rod is connected to a motor unit. The motor unit is connected to a power source. The video screen displays the visual feedback of the hand position.
