SURVEY OF INDIA

CONVENTIONAL SYMBOLS

[illegible]

1994-1995 National Highway Traffic Safety Administration

NOTES

heights and Chinese have not been shown. A relative height, H , represents the approximate height in relative between the top and bottom of a stem or abacus.

The crown of the Suda tower is badly in continual danger. Permission to use *Uromyces* south and *Uromyces* along central is required from the Japanese authorities. The other specimens of *Uromyces* and *Uromyces* are shown by green thread.

COMPI LATION INDEX

A. Completed from following sources:
 a) 125,000 scales survey carried out during 1967-68 and reported during 1972-73.
 b) 125,000 scales for Surrey Garden 1967.
 c) Updated for major catches during 2002-08.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about $1\frac{1}{2}^{\circ}$ East in 2005
(Increases by about 1° every 10 years)

1:50,000
500 m 1 cm

RESEARCHER'S NAME

Map of North Vietnam, showing the border with China to the north and Laos to the west. The map includes a grid system with letters A through N along the top and bottom, and numbers 1 through 7 along the left and right sides. Major cities like Vinh and Thanh Hoa are marked. The map includes numerous smaller towns, rivers, and roads. A large area in the center is labeled 'INDONESIA'.
