NOTES :-

Heights are in metres and involve Indian mean sea level.
Contours are approximate.

A relative height, $\approx$ r, represents the approximate height, in metres, between the top and bottom of a step slope.

Tanks shown dry, in this area usually contain water from July to November.

Tube-wells are numerous throughout the sheet, only the important ones have been shown.

Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.

A relative height, e.g., 2r, marked along a canal, indicates the height of the top of the canal bank/embankment above the adjacent country.

3,000 acre reclamation stations of Bhādra Dam project survey and their number are shown as arbitrary breaks – marks thus, A ¹³ 431 . . . BM 223-4.
