SURVEY OF INDIA

1st Edition 2016

Price: ₹ 100/-

CONVENTIONAL SYMBOLS

Manager (Tech.)  
NAGP File/Data Management

REFERENCE  
B. Baswa

NOTES:-

Height in m. in metric and above Indian mean sea level  
Contours are approximate  
A relative height, e.g., 100, against a spot, indicates its local depth in metres  
Towns, shown in blue, in this series usually contain water from July to October  
Canals and creeks, shown in blue, are generally indicated in dry season  
Limits of cultivation are variable and dependent on season  
There are numerous throughout the series, only the important ones have been shown  
A spot in a lake is used for collection of water

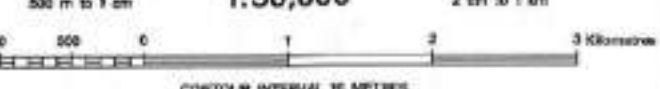

COMPLETION INDEX

A. Completed from 1:25,000 Survey 1980-85  
Updated for major details during 2005-08

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° East in 2005  
(Increasing by about 1° annually)

1:50,000

CONVENTIONAL SYMBOLS

NOTES:-

Height in meters and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 50, represents the height in meters between the top and bottom of a steep slope.  
A relative height, e.g., 50, against a wall, indicates its total depth in meters.  
Tanks, shown as, in the area usually contain water from July to December.  
Unsettled rock and coral reefs, in this sheet, are generally indicated by blue wavy lines.  
Wells are numerous throughout the sheet, only the important ones have been shown.  
Most of the unfilled well symbols indicate covered tanks, called kundis, which usually contain surface collection of rainwater.  
Dugir is a tank which is used for collection of water.  
Pillar is a place where there is a prearrangement for setting drinking water.  
Hill tops are shown as follows:-
