A relative height, e.g., δr , represents the approximate height, in metres, between the top and bottom of a sleep slope.
Tube-wells are numerous throughout the sheet, only the important ones have been shown.
Unmetalled roads and cart-tracks in this sheet are generally motable in dry season. Permission to use those along canals is required from irrigation authorities.
A relative height, e.g., $10r$, against a well indicates its total depth in meters.
