NOTES

Heights are in metres and above Indian mean sea level.
 Contours are approximate.
 A relative height, e.g. 50, represents the approximate height, in metres, between the top and bottom of a steep slope.
 The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be accurate in accordance with them.
 All cart-tracks and unmetalled roads in this sheet are generally maintainable in dry season. Permission to use these along cart-tracks is required from the irrigation authorities.
 A relative height, e.g. 30, marked along canal, indicates the height of the top of the canal embankment above the adjacent country.
 Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
 Tanks shown dry in this area, usually contain water from July to March.
