

Contours are approximate.
A contour height, to represent the
approximate height, is marked between the
top and bottom of a steep slope.
Wooded areas are colored green. Shaded
areas and other vegetation are in green, but
prominent steeply sloping areas are in black.

The title boundary between Bihār and West Bengal States has been surveyed, is printed out by the local officials on the ground but has not been verified by the State Governments.

The following land names along roads, railway and canal are shown in their type e.g. 1 where the following is a list of the names in English (type e.g. 1).

[illegible]
