

प्रारूप-11

परियोजना का नाम :-उत्तराखण्ड राज्य में 126 कि०मी० अधिकतम-कर्णप्रयाग नई ब्रॉड गेज रेललाईन निर्माण ।

Justification for locating the project in forest area

The stations have been proposed at the available flat lay of land, near the major village/town with best feasible locations to cater the commuting and commercial needs of the people residing in the project area. The alignment has been proposed between the stations accordingly keeping in view the, geological, technical feasibility of permissible curvature and gradient. Since, major part of the mountainous areas in Uttarakhand is covered with forest; it was not possible to avoid the forest land. However all efforts have been made to minimize the acquisition of forest land.
