PRABHUDHANA TANK PROJECT JUSTIFY NOTE

At the time of survey there are three sites in consideration for the construction for Prabhudhana Tank Project. But during the survey it is found that the site No.1 which is situated upstream of the proposed site having less catchment and live capacity also affecting more revenue forest land. And site No. 3 which is situated on downstream side of other sites will affect more revenue forest and protected forest, so while considering all the aspect site No. 2 which is situated between two other sites is technically better among the three sites.
