

Justification

M/s Idea is rolling out OFC cable network in Chhattisgarh for network connectivity expansion in addition to improves customer satisfaction as well to meet network quality as par benchmark set by TRAI. Thus cable line has to passes through the various lands including forest area. As known rolling out fibre cable network is essential for connectivity. If cable line lays along with the road on road side, minimum forest area will come, whereas if we divert to the other directions than there is a highly possibility of getting forest area damage and this will include more forest area.

Thus to avoid unnecessary issues regarding forest area we are planning to lay the cable line along the road and insure that we will acquire minimum forest land, whereas our first priority will be not to harm forest environment.
