OFFICE OF THE EXECUTIVE ENGINEER JAL SHAKTI
PHE DIVISION QAZIGUND

Justification for Forest Land Diversion

The scheme "Augmentation Brinal along with laying of 150 mm dia, 1500 metre raw water main" is sanctioned and approved under NABARD. The proposal of the project is to provide potable drinking water supply to village Brinal after its completion. Also, no other feasible land except forest land is available for construction of said scheme as the proposed/ identified land is at higher contour covering the entire area/ village. The department needs only 0.0819 hectare of land for construction of various structures including intake pipe line for which forest clearance is required.
