NOTES:
Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 100, represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre stone numbers along the railway and roads are shown in slant type, e.g., '10' where the reference number is shown in upright type, e.g., '10'.
A relative height, e.g., 100, marked along a canal indicates the height of the top of the canal embankment above the adjacent country.
Perennial streams in this sheet generally freeze from October to June at the place indicated as such. Tanks, shown dry in this area, usually contain water from July to December.
Unimproved roads and cart tracks in this sheet are generally not navigable in dry season. Permission to use these along canals is required from the irrigation authorities.
