

**OFFICE OF THE EXECUTIVE ENGINEER  
WATER RESOURCES DIVISION NO.1 DHAR  
DISTT.DHAR (M.P)**

**Chunar Tank Project Distt.Dhar (m.p)**

**A note containing justification for locating the project in forest land :**

Chunar Tank Project envisages construction of earthen bund near village Chunar on a local nalla named Chunar. At point of proposed bund near Chunar Nalla drains 52.00 Sqkm. The project is prepared to serve the need to provide productive irrigation to deprived society of nearby tribal villaes. An extensive survey was carried out to achieve minimum submergence was marked out at various capacities. Finally keeping F.T.L at R.L. 67.75 with capacity 7.149 Mcum was finalized by Superintending Engineer Water Resources Circle Dhar (MP) for cost of rs. 2582.92 Lakhs to irrigate 1620 ha. Of rabi.

It is evident that either by shifting location or increasing capacity submergence will increase. This increase will effect submergence of forest area. Therefore proposal is prepared with minimum submergence of forest land and to serve rain fed area and to serve deprived society of nearby villages.
