NOTES

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, h_r , represents the approximate height, in metres, between the top and bottom of a steep slope.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the sea-levelled bench-marks and may not be strictly in accordance with them but the discrepancy is unlikely to exceed 2 metres.
Tanks, shown dry, in this area, usually contain water from July to September.
Cart tracks in this sheet are generally moderate (four wheel drive).
Distance stones along the railway are in miles.
