

Justification for locating the project in forest area
(Certificate regarding alternatives examined for linear project)

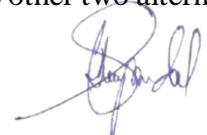

Certified that following alternatives detailed as below and also shown in enclosed map on page No. have been examined in detailed and have come to conclusion that the alternatives No 1 is the most suitable for forestry point of view and the Forest land required for the project in Alternative No. 1 is lesser than the Alternatives Nos 2 & 3.

Alternatives Explored for Jagdishpur-Haldia-Bokaro-Dhamra Pipeline (JHBDPL) Project of GSPL GAIL (INDIA) LIMITED in West Bengal State					
Description	Status of land	Length in meter	Width in meter	Area in Sqm	Area in Ha.
Alternate-1	Forest	645.0	10	6450.00	0.6450
Total		645.0		6450.00	0.6450
Alternate-2	Forest	14445.00	10	144450.00	144.45
Total		14445.00		144450.00	144.45
Alternate-3	Forest	1274.30	10	12743.00	12.74
Total		1274.30		12743.00	12.74

The other alternatives (Alternative-2 & Alternative-3) are being rejected on grounds of as follows: -

1. Alternative 2 & 3 involves more forest area 144.45 and 12.74 hectares respectively to be diverted which is more than the alternative-1.
2. In Alternative -2 the pipeline will be in close proximity to the sensitive sanctuary area. Laying of natural gas pipeline in the sanctuary sensitive area is technically not feasible involving safety of the pipeline.
3. The terrain in Alternative Route-2 and 3 is hilly where laying of pipeline poses several construction challenges.
4. Alternative -2 passes near to the area where most of the lands are non-agriculture land and pipeline cannot be laid in NA lands as per P&MP Act'1962.
5. Though the overall length (Forest area and Non-forest area) of the pipeline is more in Alternative-2 which increases the project cost.
6. Alternative -3 passes in close proximity to populated areas and most of the lands are also non-agriculture land; pipeline cannot be laid in NA lands as per P&MP Act'1962.
7. Number of railway crossings in Alternative route-3 are more (3 nos) in comparison to alternative -1 and 2.
8. Number of turning points (TPs) in Alternative 2 and 3 are more that needs bends etc which will add-on to the cost of the project.

Looking into the above, it is imperative for JHDPL natural gas pipeline passing in Jharkhand in Alternative-1 is more apt technically and safety in comparison to the other two alternatives viz., Alternative-2 and Alternative-3.
