

Name of Work: – Four laning of Road project at Bhomoraguri reserved forest from Km 0.000 to Km. 17.3 of NH – 37A.

An area of 6.0 Hect land of the forest land proposed for diversion in Bhomoraguri reserve forest is required for construction and widening of the existing road and the approaches of the proposed new Brahmaputra bridge parallel to existing bridge for making it 4-lane configuration.

For this project widening of the existing road alignment, 60 meters (approx) width from the existing road is required. Moreover, the widening of the road in 60 meters (approx) width is required starting from the Total Station points T.S no. P₂ to P₃₆, and in 40 meters to 50 meters (approx.) width from T.S No. P₃₆ to P₂₃ is required.

For the approach road at the proposed new Brahmaputra bridge another 60 meters width from the previous road boundary is required within TS No. P₇ to P₁₂ and from TS No. P₁₂ the road width gradually decreases and finally meets at the TS No. P₁₅ on the existing road. Remaining area 0.205 Hect land for the construction of the embankment slope of the road is required.
