

Justification for locating extension of Quay / Jetty in forest lands for the proposed Fishing Harbour at Nizampatnam (Phase-II).

As per the DPR approved by CICEF, the Extension of Quay/Jetty to be constructed along the northern bank of Tungabhadra Channel due to increase in Fishing vessels. In continuation that the land required for the construction/extension of quay available is only 2070 Sqm out of 12995 Sqm. So, the balance land required/acquisition is put up for taking the existing low-lying area for the construction/extension of Quay/Jetty to provide the berthing facility for Fishing Vessels.

Since the existing fishing harbour, Nizampatnam is located in the Nizampatnam RF like an enclosure, and due to non-availability of non-forest lands viz., Patta / Revenue / Government lands in the proposed or adjacent area, it is inevitable to locate the extension of Quay / Jetty in Nizampatnam RF.
