### AIMS AND OBJECTIVES OF COUNCELLING CENTRE

With the Spirit of responsibility for the deteriorating conditions of the society in general and local youths in particular, we the members of the C.O.G. , 4 ½ Mile could not be just the spectators but decided to do something to guide the youths in the right path of good living and be good citizens.

So we found out that only counselling centres is the best way we can get in touch with the youths in providing them good advice and other help.

Most of the youths, out of frustrations and lost in life joined the extremist group for which they gain nothing except more complications, bringing hardships and problems to the society and their families including themselves.

Thus in the Counselling centre we aim :

- 1) To help the youth understand the bad effects of drugs and alcohol.
- 2) To guide them to choose right path/time in their studies.
