Justification for locating the Project road in Forest Land.

The proposed project is an up-gradation of existing road to 4 lane configuration along with geometrical improvements as per IRC guidelines. The existing project road passes through forest sections at some locations. As there is an increase in traffic volume along the existing road, existing road need up-gradation to 4 lane configuration with proposed ROW of 60 m. The proposed alignment follows the existing alignment to the maximum extent possible without compromising safety and technical aspects. The alignment within the forest area suits the existing topography and forest land diversion is the minimum required. Any other alternative chosen for the project shall involve acquisition of more private, government and forestland.

Yours Sincerely

**KN Ajay Mani Kumar
DGM (Tech) and Project Director**
