Justification for the approach road in the forest land

The proposed beach resort and wellness center is situated in Kagal Village, Kumta Hobli, Uttara Kannada District is enveloped by coastal at one end and forest land at the other sides, thus making it a land locked area. Total project area is about **21.7296 Ha**, out of which **20.74 Ha** is Non-forest land which is the project site and **0.9896 Ha** of forest land which is the approach road for the project site. The proposed approach road is the existing path which is used by the public for general works. So we have proposed to utilize the same existing path as the approach road to reach our project site. Since there were no alternative roads we proposed to use the existing path. We have considered a minimal alignment with a total area of **0.9896 Ha** of an existing mud road so that the impact on the forest boundary is least/negligible.

Thanking you,
