REFERENCES

NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 20 represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre values shown along roads, roads and railways are shown in slant type, e.g., 'S' whereas the mile values are shown in upright type, e.g., '6'.
Unmetalled roads and cart tracks in this sheet are generally motorable in dry season. Permission to use these along roads is required from the Irrigation authorities.
Wells and tube wells are numerous throughout the sheet, only the important ones have been shown. The common boundaries of the Reserved Forest have not been shown for want of reliable information. Tanks, shown dry, in this sheet usually contain water from July to December.

COMPILED INDEX

A Modern Survey 1970-71. Updated for minor details during 2005-06 and administrative boundaries updated during 2008-09.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° West in 2005. (Decreasing by about 1' annually).

1:50,000

500 m to 1 cm

2 cm to 1 km

5 Kilometres

CONTOUR INTERVAL 20 METRES
