The Sub-Divisional Engineer,
M.C.P.H. Sub-Division No.2,
Chandigarh.

To

Deputy Conservator of Forest,
Sector 19, Chandigarh.

Memo No.: - 1365-66

Dated : - 27/10/2020

Subject: - Allow to emergent replacement of existing water supply pipe line passing through to forest area adjoining boundary of PGIMER, Sector 12, Chandigarh.

It is brought to the notice of your good self that the work of replacement old/existing 1000mm dia MS pipe line in the campus of PGI Sector 12, Chandigarh is in progress. During excavation of existing pipe line near the boundary wall of PGI campus, it has been noticed that pipe line crossing boundary of PGI and entering to the forest area is also in a bad condition as strength of pipe line as well as joints of pipe line found weaken in the forest area. It is pertinent to mention that the pipe line was laid approx 30 to 35 year back and now over the time strength of pipe got weaken and not able to with stand the potential of welding ~~area~~ to join new pipe with existing pipe line. This pipe line is supplying clear water to the complete VIP area i.e. Sector 1 to 11, PGI etc. and remain under charge 24x7. Being huge pressure in line it can got burst/leak any time which may further cause to damage of civil structure, underground services, boundary wall and also interruption of water supply to VIP and PGI area. Being emergent approximate 60 to 70 meter length of old/existing pipe line has to be replaced.

Therefore kindly allow this office to replace approx 60 to 70 meter length of 1000mm dia pipe line passing through forest area adjoining boundary wall of PGI campus Sector 12, Chandigarh for smooth running of water supply to PGI as well as VIP area.
