NOTES :-

A relative height, Δ , represents the approximate height, in metres, between the top and bottom of a steep slope.
Names and boundaries of sub-division of the Patna (new district of Arunachal Pradesh) have not been shown for want of reliable information.
The whole boundary between Arunachal Pradesh and Assam is indicated in this sheet. The alignment of boundary shown on this map, is as interpreted from 1:50,000 map of Sheet No. 63 1/3, as revised 1987, but has yet to be verified.
The area adjoining the Subansiri and Subansiri rivers is liable to change owing to continual fluctuations in the course of the rivers and remains usually flooded during rainy season.
Jams or temporary cultivated areas occur throughout the forest; they are normally abandoned after 2-3 years and are not shown.
Boundary lines are shown thick.
