

ANNEXURE -9

Justification for locating the project in forest area.

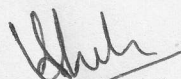

Name of the project:- 66KV Savdas na Muvada to Rajayata S/C H-frame Line.

The Gujarat Energy Transmission Corporation Limited (GETCO) is executing the 66KV Savdas na muvada-Rajayata H-Frame line with ACSR Panther Conductor.

Keeping in view the forest conservation act, detailed investigation in the area is carried out before finalizing the route of 66KV Savdas na muvada-Rajayata line in order to avoid / minimize the used of forest land. This route is selected to give power supply to Rajayata Sub-Station for catering power of Rajayata & surrounding villages (Tribal Area). This route is selected accordingly; however some areas shown in the map could not be avoided because of the following points.

- 1 There is a certain belt of continuous forest falling across the route of transmission lines.
- 2 The present villages and obstacles also make it possible to avoid the entry in forest area.
- 3 Provision area laid down in Indian Electricity Act, 1956 for laying transmission lines.
- 4 To satisfy Technical Specification.

This Project is to be executed as per schedule of Eleventh 5 Year Plan. This is to be completed by December 2014; after project is completed it will definitely serve social and financial benefits to surrounding areas of Rajayata. This will also help in industrial and agriculture development.
