

END USE PLAN OF CHROME ORE

End Use Mineral

The proposed Mining project i.e. FACOR Kalarangiatta Chromite Mines is producing Chrome Ore from their Lease hold area. The average grade of Chrome Ore produced from the project is of 40-42% Cr_2O_3 . The Chrome Ore so produced from the mines is used for captive consumption at (1) Charge Chrome Plant, Randia, Bhadrak and (2) Ferro Chrome Plant, Garividi, Andhra Pradesh.

The Chrome ore so produced in the Mines is despatched to both the above captive plants by road.
