National Highway No. 15

NOTES :-

NOTES :-

Heights and contours are not shown in this sheet.

A relative height, h , represents the approximate height in metres between the top and bottom of a steep slope.

A relative height, e.g. d marked along a canal and rivule indicates the height of the top of the canal or rivulet above the level of the adjacent low-lying land.

Canal distance zones are 1,000 feet apart and every existing 500 ft zone is shown.

Unsettled roads and cut-tracks in this sheet are generally restorable in dry season. Permission to use along canals is required from the irrigation authorities.

Tanks shown in this area usually contain water from July to September.

The administrative boundaries and names have been updated to 2007.

Five places of religious importance falling in Sq. Nos. R1, C3, D2, E2 & F2 belong to Moghal period and these are unprotected monuments.

COMPILATION INDEX

A. Compiled from 1:25,000 survey 1966-69

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about $1\frac{1}{4}^{\circ}$ East in 2005.
