

Name of work: Four Laning Road Project of NH52A at Gohpur Reserved Forest from km 20370 to 25600

1. Since already double lane road is existing and before finalization of alignment at the time such type of alternatives were considered and now we are going to widen existing road at its present alignment as much as possible to save Govt. money so question of considering alternative alignment is not considered during widening work of existing road.

2. This area falls on NH-52A which is presently double laned road from Nagaon to Holongi. Now Govt of India, Ministry of Surface transport has decided to 4 lane this complete road in next three years due to increase in traffic on this road in last 05 years. Present width of this road is not sufficient to accommodate traffic volume on this highway. For widening of this road as per National Highway act 60 meter width of road land has to be acquired to keep traffic clear from the problems of other construction activities along the road.

3. Accordingly this proposal is being initiated as per guidelines of Govt. of India.
