

The land that we seek is only for the approach road from the main PWD road to our Project road. Its total area is only 31 square meters and it's only a strip of land required for approach road to our project. As you can see, there was no alternative to search for other areas and do survey so as to prevent forest land use. This land strip is that falls into forest land is away from any eco sensitive zone and not in any active vegetation zone as it just 20ft wide at the side of a road.

We have uploaded the CLU in the additional information column which has been approved by chairperson DLCC/Deputy Commissioner, Panchkula and issued by Municipal Commissioner Panchkula, as our land is less than 1 acre and falls in MC limit. CLU from DTP is issued only if our Land had been more than one acre and falls outside MC limit.

Moreover, CLU is issued when multiple departments, one of them being PWD Haryana, issues feasibility report on the portal, and we have uploaded NOC from PWD B&R Haryana for the same.

Our justification for seeking this forest land is that without it we cannot access the PWD built road just 20 ft away from our project and there were no possible alternate sites
