**JUSTIFICATION FOR LOCATION OF APPROACH ROAD TO BRIDGE.**

The current project is “ Construction of bridge (Composite Structure Bridge) across Cauvery River between Talakadu and Malangi village in T. Narasipura Taluk, Mysore District”.

Construction work site has been located at Talakadu village, T.Narasipura Taluk, Mysore District, after considering various factors such as river discharge, section of the river, soil investigation, elevation etc. Based on the surveys conducted current site has been found to be most efficient and no other locations fulfil above criteria to be able to meet the requirements of the construction work location.

Bridge and approach road are designed based on the best possible alignment and there is no any option of alternative location.

Construction of bridge is the main component of the project including sub component like improvement of approach road. The bridge connects the many villages and pilgrimage temples. The approach road also connects the Vaidyanatheshwara Temple in Talakadu. A grand festival “Panchalinga Darshan” is celebrated once in five years at Talakadu. Lakhs of people participate in this festive celebration. On this occasion the temporary bridge is constructed by Army force. The bridge provides interconnectivity among towns and villages, also provides connectivity to famous temples and prominent tourist places.

Hence construction of above bridge and approach road is very much necessary to the public.
