NOTES

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, Δ , represents the approximate height, in metres, between the top and bottom of a steep slope.
Powerful streams in this sheet are generally fordable from October to June and ferry service is available on them from July to September at the places indicated as such.
Tanks, shown dry, in this area usually contain water from July to December.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
Unimproved roads in the sheet are generally motorable in dry season. Permission to use these along canals is required from the Irrigation authorities.
The district boundary in the Ghazal or Ganga River follows the main deep water channel and will change with the fluctuations of that channel.
