NOTES

Height and Contour have not been shown.
A relative height e.g. 20 represents the approximate height in metres, between the top and bottom of a steep slope.
This sheet has been compiled from 1:25,000 surveys.
The area shown in this sheet is roughly delineated and the variation given may differ largely from the actual value.
Some of the rocky islands in Arabian Sea have been omitted from the information supplied by the Chief Hydrographer to the Government of India and have not been topographically verified.
A relative height e.g. 200 against a well indicates its total depth in metres.
Position of pylons of power lines has not been surveyed.
