

Justification for Location of the Project in Forest Area

Proposed transmission Line alignment for Construction of 220 kV double circuit transmission line from new 400/220 kV GIS Jauljibi substation to 220 kV substation Pithoragarh and LILO s line of 400/kV D/C of Dhauliganga- Bareilly line at 400/220 kV GIS Jauljibi substation under Northern Region system strengthening scheme(NRSSH-XXXVII) has been examined for Social Technical and Economical consideration and possible efforts were made to avoid the forest land by **Powergrid Corporation of India Limited Jauljibi**, but some forest block can't be avoided due to unavailability of route, hence without forest land involvement construction of Transmission Line can't complete.

It is further added that no ant other is feasible and forest land involved in the proposed transmission line alignment is bare minimum.
