**JUSTIFICATION NOTE FOR PROPOSED ALIGNMENT.**

Proposed alignment is not involved any kind of trees cutting throughout the alignment including both rising main & distribution network. The proposed pipe line will be laid within the RoW of state highway 146, hence there will be no cutting of trees.

Whereas,

- Alternate alignment -1 & 2 (**Annexure-11**) (L=1894mtrs & 1720mtrs.)
  - Alt-1 will be involving huge numbers of trees cutting for a length of 1146m out of 1894m.
  - Alt-2 is also involved huge numbers of trees cutting for a full length of 1720mtrs.
  - In both Alt-alignments there is no space for the laying of pipes without cutting the trees.
  - Even though the forest area will be less as compared to the proposed alignment but the cutting of trees is not only for pipeline but also for the machineries movement along the alignment, hence there will be additional cutting of trees.

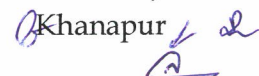

Since the proposed Alignment is avoiding the trees cutting throughout the alignment. Hence this is suitable alignment.

Your's faithfully,

 8/12/2020
