

DETAILED NOTE ON THE PROJECT

Providing CPWS Scheme to Saline effected 44 coastal habitations with desalination process in Ulavapadu and Gudluru Mandals in Parakasam District was administratively sanctioned for Rs 12.00 Crore by the Government of Andhra Pradesh to provide safe drinking water to 44 Coastal Habitations in Gudlur and Ulavapadu Mandals.

The proposed project is most important to mitigate the Drinking water Scarcity due to brackish water problem as these habitations are existing ever closer to Bay of Bengal by providing safe drinking water.

Providing safe drinking water from Rallapadu Reservoir as source will improve not only the health but also the living standards of the people in the area. In addition to above, substantial economic gain in terms of reduced health hazards and reduced work burden on women folk will be achieved.

Part of the pipe lines pass through reserve forest area of Mocherla in Gudlur Mandal. The existing drinking water facilities are based on ground water which are very poor in quality and insufficient to cater the need of the people in the area. As such it is proposed to provide comprehensive drinking water from safe surface source of Rallapadu Reservoir at Pentrala Village in Lingasamudram Mandal for the people in the area.
