### REFERENCE

NH 99 National Highway No. 99

NOTES :-Heights are in metres and above Indian mean sea level.

Contours are approximate. Tanks shown dry, in this area usually contain water from July to December.

Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. The common boundaries of the Protected Forests at some places in this sheet have not been shown for want of reliable information.

A relative height, .8r, represents the approximate height, in metres, between the top and bottom of steep slope. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands. The kilometre stone numbers along roads are shown in slant type, e.g.5 whereas milestone numbers

COMPILATION INDEX

are shown in upright type, e.g. 5.

A. Surveyed during 1978-79. Updated for major details during 2004-05.

Projection - UTM Datum - WGS 84 Magnetic Variation from True North about 1 West in 2005. (Decreasing by about 1' annually).

NOTES :-

Heights are in metres and above Indian mean sea level.

A relative height, .8r, represents the approximate height in metres, between the top and bottom of a steep slope.

Tanks shown dry, in this area usually contain water from July to February. Wells are numerous throughout the sheet; only the important ones have been shown.

The kilometre stone numbers along roads are shown in slant type, e.g., '5' whereas milestone numbers are shown in upright type, e.g., 5. The district boundary between Chatra and Hazaribag Districts has been surveyed as pointed out by the local officials on the ground but has not been verified by the District authorities.

The exterior boundaries of area of Reserved or Protected Forests are shown by green ribands.

NOTES :-

Heights are in metres and above Indian mean sea level.

Conthus are approximate.

A relative height, 8c represents the approximate height, in metres, between the top and bottom of a steep slope.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the

spirit-fevelled bench-marks and may not be strictly in accordance with them. A relative height, e.g., ...6c marked along a canal, indicates the height of the top of the canal embatikment above the adjacent country.

Unlined wells are numerous throughout the sheet; only the important ones have been shown. Unmertitled mads in this street are generally motorable in dry season.

Tanks, shown dry, in this area usually contain water from July to February.
