SURVEY OF INDIA

1st Edition, 2027.

CONVENTIONAL SYMBOLS

REFERENCE

NOTES:

NOTES :-

Heights are in metres and above Indian mean sea level.

Contours are approximated.

A vertical height, e.g., 3, represents the approximate height, in metres, between the top and bottom of steep slope.

A relative height, e.g., 3, marked along a contour, indicates the height of the top of the contour above the nearest valley.

Tells which way, in this area, usually comes water from Valley to blanch.

Sheds and fold-outs are numerous throughout the whole, only the important ones have been shown.

Unimproved roads and contour lines are shown in the same manner as in dry areas. Permission to use those along creek is required from the Irrigation authorities.

The triangulated heights and contours in this sheet have not been adjusted as the heights of the spirit level.

Yarnate River is liable to continual change owing to shifting of the river bed.

Contour boundaries in this sheet have not been verified by the Ordnance Survey Office concerned.

The boundaries between the United States and the United States have been determined by the act by the office on the ground but have not been verified by the Government concerned.

The state boundary pillars on United States and Yarnate States have not physically found.

COMPILATION INDEX

A Compiled from 1,25,000 survey of 1989-90 and updated from rapid verification survey 2000-05.

Projection = UTM Datum = WGS 84
