NOTES

heights are in inches and mass values are in kg.

Intervals are approximate.

① relative height g is the approximate height, in meters, between the top and bottom of a group of trees.

② United States Forest Service (USFS) data are shown in black and have been verified.

③ *Tree*, about 10% of the area usually covered since July 10 to April.

④ *Forest* consists of an L200-foot gap and canopy growing 800 ft above the ground.

⑤ *Forest* along rivers and roads is the forest and growing vegetation in the canopy. Forestland is the area along rivers and roads that is not growing vegetation.
