HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

* Water features are shown in blue where they generally contain water
* Cultivated areas are coloured yellow.
*The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.
A relative height, 6r, represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

* Not applicable.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
The area shown on this map is magnetically disturbed and the variation given may differ largely from the actual value.
Unmetalled roads, in this sheet, are generally motorable in dry season.
Tanks, shown dry, in this area usually contain water from July to March.
Cultivation is periodic and dependent on rainfall.

Administration Index
