

JUSTIFICATION FOR ROUTE SELECTION

In continuation of the requirement of Environment parameters, construction methodologies to be adopted for different terrain encountered en route, design and engineering factors, availability of logistic support during construction and maintenance of the road, finally, after analyzing the various data this route is found feasible and no other alternate except this for demanding forest land and hence the required forest land is requested to be granted for the purpose.

Factors Considered: -

1. Traffic will be play smooth & Safe.
2. Compliances with Environment regulations.
3. Minimum demand of forest land.
