REFERENCE

Depression

NOTES :-

ages are in metres and above Indian mean sea level. Distances are approximate.

Relative height e.g., 4 m marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

As shown on Fig. 1, in this area usually canal water from July to December.

Distances are measured throughout the sheet, only the important ones have been shown.

Canal roads and cart tracks in this sheet are generally motorable in dry season. Permission to use these along canals is required from the irrigation authorities.

Small distance stations along Salawati canal are 500 feet apart and every existing fifth store is shown.

On other canals there are 1000 metres apart and every existing one is shown.

On the Salawati canal, the rectangular stores of Bhikara Dam Project Survey are shown as tertiary bench-marks.

Scale 1:50,000

Sheet No. 358, Map 230-4.

COMPILATION INDEX

Surveyed during 1992-93. Updated for more recent data.
