HEIGHTS & CONTOURS IN METRES  
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.  
Cultivated areas are coloured yellow.  
\*The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands

Contours are approximate.

A relative height,  $\Delta r$ , represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent survived trees are in black.

\*Not applicable

The kilometre stone numbers along roads are shown in slant type, e.g. '5' whereas milestone numbers are shown in upright type, e.g. '5'. The common boundaries between Reserved Forests in some cases have not been shown for want of information. Canal distance stones are in miles except along Western Yamuna Canal where these are 1000 feet apart and every fifth stone is shown. Unmetalled roads inside the forest and along canals are usually mettable. Permission to use these roads is required from the authorities concerned. A relative height, e.g. '30r. against a well, in blue, indicates its total depth in metres. The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks, and may not be strictly in accordance with them.

All unenclosed roads and cart-tracks in this sheet are usually removable in dry season.  
Perennial to use roads and cart-tracks along canals is frequently from irrigation authorities.  
All distance zones are in miles.  
A relative height, e.g., AC, marked along a canal indicates the height of the top of the canal embankment above the adjacent country.  
Walls are numerous throughout the sheet; only important ones have been shown.  
The height of the walls in this sheet has not been adjusted to the height of spirit-levelled bench-marks and may not be strictly in agreement with them.  
The Haryana-Uttar Pradesh boundary has been surveyed as pointed out by the local officials at the ground, but has not been verified by the Government concerned.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

\*Not applicable.

The kilometre stone numbers along roads and canals are shown in plain type, e.g., "2" whereas milestone numbers are shown in upright type, e.g., "5".

The unimproved road along Kuttanad Branch (BETWA CANAL) and car-roads along other canals are usually motorable in dry season. Permission to use dies is required from the Irrigation authorities. Other cart-roads are generally jeeps only.

There are no roads or cart-roads along the canal. Informal tracks are used by the canal authorities and the adjacent country.

Perennial streams in this sheet are generally formed from October to June at the places indicated as such.

Streams, shown dry in this area, usually contain water from July to December.

Wells are numerous throughout the sheet; only the important ones have been shown.

The road network between Jidali, Pindavi and Sattar (Jidali State) has been surveyed as plotted out by the local officials on the ground but has not been verified by the Government engineers.
