

CHECKLIST NO. 9

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

04-70-00 Hectares of total forest land is required for the "**C/o Road from kiari to Khinna km 0/000 To 7/820.**" The road has already been constructed in length of 7.705 km out of which 5.225 kms are in forest land and the remaining are in private land and is put to use for local people. At present there is 1.85 hectares of forest land violation and the proposal is for additional 2.85 hectares of forest land ($1.85 + 2.85 = 4.70$) to be diverted for construction of Road. At present there is 2.40 meters wide road which is inadequate for smooth plying of traffic and does not qualifies in the motorable category specifications of the road. Hence, the road needs to be widened along the existing alignment to complete the road as per the motorable specifications and then finally connect it to village Khinna. Therefore , total 4.70 hectares of forest land needs to be diverted for the purpose of construction of this road.
