NOTES >

Height is to measure above rather than sea level.

Distance are approximate.

A relative height e.g. x , represents the approximate height, in metres between the top and bottom of a steep slope.

Take a short cut, in the rain usually occurs under from 15 to 20 days.

Intermittent dry and wet-lands in this area are generally not suitable for dry season. Permission to take along roads is not required, but it is recommended.

The source of Wabulungu River is likely to be in the area.

Distance shown along Wabulungu River (Wabulungu) and previous observations are 1,500 m and water entering 500 m above the river channel along Wabulungu (Wabulungu) River, shown in the diagram.

2,000 m (approximate distance of Wabulungu River Project Survey) with their numbers are shown in the diagram.

Distance made shown from x to y and y to z .
