

Justification for renewal of the project

Mugdara Dolomite Mines of OCL India Limited is located at a distance of 26 kms in northwest direction on Mandla Nainpur road from district head quarter Mandla, Madhya Pradesh. The Dolomite of the area is of SMS, LD and Refractory grade will be supplied to different Steel Plants. It may also be used for manufacturing superior quality Dolomite refractory bricks in our own plant situated at Rajgangpur, in the District of Sundargarh, Odisha. Therefore, the Company needs a captive source to ensure quality and quantity of Dolomite for being supplied as a gesture of good relation since the year 1974 and is being continued till now.

After start of Mining activities it will also provide business to many truck owners and direct – indirect benefits to hundreds of people. In this way the mines are providing employment and business to the locals. Over and above, the State Government will get revenue generation in form of royalty, cess and other statutory payment.

In this way the continuation of mining beyond 2014 will definitely be beneficial for development of such remote place.
