

### Justification and Detailed note of the Project

The present proposal is for diversion of forest land to an extent of 0.549 Ha (778.39 M length & 7 M width) falling in Yadadri Bhuvanagiri Division of Ibrahimpur RF for use of access of existing approach road to access patta lands in Sy.No.86 to 90 for agriculture and transporting the farm produce and other farm equipments.

There is no non-forest land approach to reach the agriculture lands, as the land is surrounded by forest area and it is an enclosure and do not have any alternative approach road to reach our lands, except for formation of road through Forest Area, which was in use for many decades, which is little bit narrow and hilly. To do the agriculture activities on daily basis we need to have more widened and clear thorough fair to access our agriculture lands.

The extent of forest land required is as follows:

Division Name	Block Name	Length in Mts	Width in Mts	Area in Ha
Yadadri Bhuvanagiri	Ibrahimpur	778.39	7	0.549
